

RAFAŁ BARYŁA

Automation Scripts Developer
Project Configuration Expert
Prompt Engineer
Music Composer
Media Producer
Voiceover Artist
Photographer
Guitarist

PROFILE

I'm a multidisciplinary professional working at the intersection of technology and creativity. With experience as a Project Configuration Engineer, Automation Scripts Developer, and Prompt Engineer, I build efficient solutions that bring ideas to life.

Alongside my technical work, I compose music, play guitar, and produce audio-visual content, blending sound and visuals into immersive experiences. I also work as a voiceover artist, delivering clear and engaging narration. I specialize in bridging logic and creativity to

SKILLS & ATTRIBUTES

Core Competencies

Process Automation	Creativity and Multitasking
Sound Design & Production	Prompt Engineering
Business Process Design	Analytical Thinking
Automation Scripting	AI Workflow Design
Project & Team Management	System Architecture
Project Management Support	ASPICE, ISO 10007:2017

Programming & Tools

Python	VBA	HTML & CSS
Requests, Pandas, Numpy, Jinja2, Flask, Beautiful Soup YAML, OpenPyXL, CSS3, Sys, PathLib, JSON		
GitLab	GitHub	Teamcity
MS Excel	WordPress	Jenkins
JIRA	Confluence	Parasoft DTP
Sharepoint	Miro	Claude
Codebeamer	Polarion	Gemini

Infrastructure & AI

Docker	Docker Compose
Nextcloud	PostgreSQL
n8n	Ollama
Self-Hosted AI	Local LM's
SSH	Traefik

Operating Systems

Windows 10 /11
Linux
Distribution: Ubuntu 26.04 LTS "Resolute Raccoon", UBUNTU Studio

EXPERIENCE

Project configuration expert

intive

11.2023 - present

Management of the configuration of the project. Supporting the Project Management (MAN.3) and Quality Management (SUP.1) activities by providing configuration status reports and ensuring that baselines across the tools for certain project milestones are created.

- o Task and workflow automation and general process improvement w/ usage of modern solutions, including A.I.
- o Tool (codebeamer) configuration
- o Business design of various processes connected strictly to configuration management
- o Constant process improvements
- o Developing Configuration Management Strategy
- o Developing Branch Management Strategy [w/ Software Integration Manager]
- o Identifying Configuration Items
- o Creating Configuration Status Report
- o Establishing Configuration Management System
- o Establishing and conduction Baseline Audits [on Release/PI]

Founder

ENTRO.PY (Operations + Sound Studio)

01.2015 - present

Operations : ENTROPYSERVER (CLOUD) project :
a self-hosted server environmentrunning on personal hardware, designed to combine private cloud storage,workflow automation, and local AI models within a containerized infrastructure. The goal was to create an independent platform for data storage, serviceintegration, and automated AI-driven workflows.

Implemented:

- o Docker environment installation
- o Container infrastructure configuration
- o Deployment of Nextcloud private cloud
- o Setup of PostgreSQL database
- o Installation of n8n automation platform
- o Installation of Ollama for running local LLM models
- o Download and preparation of AI models
- o Docker networking between services
- o Creation of docker-compose configurations
- o Administrative access configuration
- o Debugging and stabilization of the n8n environment
- o Basic system monitoring setup

Sound Studio :

- o Sound production and recording as part of my personal development activity towards sound engineering
- o Mix and mastering (Akustyczni Band, Susanna Jara)

- o Music production (Jacek Tomkowicz, Radiowcy Bez Cenzury, Mafijne Historie, Opowiem Ci Historię oraz Niewyjaśnione (podcast)
- o Sound on a video set (Bar Gwiazd, F4 Team: Uniroyal)
- o Voiceover recording (Own voice, Robert Makłowicz)-
- o Website design and administration

Project configuration engineer

Aptiv

08.2021 - 10.2022

- o Conducted Baseline Audits for cross-functional projects.
- o Collaborated with Configuration Managers to verify project deliverables and baselines.
- o Designed and implemented automation solutions to enhance efficiency.
- o Contributing to all Configuration Manager activities relevant for ASPICE SUP.8 process

Product management and Social Media Artist

Omniprint3d

05.2020 - 05.2021

- o Product photography and promotional campaign in social media;
- o Brand design: logotypes + graphic design;
- o Compilation of simple 3D printing projects;
- o Configuration of live-streaming on Youtube and Twitch TV

Broadcast engineer

Polish Radio Kraków

08.2018 - 07.2021

- o Produced and managed live broadcasts, concerts, and studio recordings.
- o Delivered technical support for ATEM software and audio-visual equipment.
- o Enhanced program delivery by optimizing AV setups and workflows.
- o Cooperation with Program Trzeci Polskiego Radia - realization of TrzeciaStrona Księżyca

Audio / video producer

RMF FM Radio

04.2015 - 07.2018

Broadcast management of biggest radiostation in Europe

- o Radio program ON AIR realization: Fakty RMF FM and e.g.: Lepsza Połowa Dnia, Poplista+, Wstawaj Szkoda Dnia, Loteria RMF
- o 24/7 music playlist mixing

🌟 <https://linktr.ee/rav.baryla>

- Production and post-production of jingles, spots, promos and other forms of radio-binging
- Production of advertisements
- Preparation of audio materials for various radio shows
- Video recording and production (Poplista Live Sessions, Poranny Felieton etc.)

Editor-in-chief / director (since 02. 2014)

Head of the technical department (since 04.2013)

04. 2012 - 04. 2015

Studenckie Radio17

Editor-in-chief:

- Project management (editorial board)
- Team leadership
- Financial management
- Event-hosting/running (including Juwenalia Krakowskie, Juwenalia AGH andBieg AGH)
- Website design and administration (WordPress)
- Design of visual promotional materials

Head of the technical department:

- Production of radio binging (jingles, sweepers background music etc.)
- Setting up a broadcasting studio from scratch
- Operating of consoles, mixers and audio equipment at the advanced level
- Simple bash scripting (process execution)

Apprenticeship

PGE Jarosław

07. 2013 - 08. 2013

- Analysis of energy network projects

COURSES

- Music and Sound for Games • OUTPOST Academy 02-06.2025
- Python • Jet-Brains Academy 01-03. 2022
- Excel from beginner to expert complete course • Udemy 08-10. 2022
- HTML & CSS • Code With Mosh 11-12. 2022
- Python Complete Course • Code With Mosh 01-06. 2023
- GIT CI/CD • Udemy Business 10-12. 2024

EDUCATION

POWER ENGINEERING (BACHELOR OF ENGINEERING)

10. 2010 - 06. 2015

AGH University of Science and Technology in Kraków

- Specialization: Devices, Networks, and Power Systems
- Key Projects: Fluid mechanics research (Particle Image Velocimetry)
- Technical Proficiency: DaVis by LaVision, CAD, ArCADia

REMARKABLE PROJECTS

- Successfully supported ASPICE Level 2 achievement during customer assessments for automotive projects, including Volkswagen audits.
- Designed and developed advanced automation solutions, including Python-based data fetchers, reporting systems and workflow optimization tools used in large-scale automotive environments.
- ENTROPYSERVER Project: Architected and maintain a self-hosted cloud, automation and AI infrastructure integrating Docker, Nextcloud, PostgreSQL, n8n and local LLMs, creating an independent platform for private cloud services and AI-assisted workflows.
- Portable DSP Guitar Platform: Engineered a custom hardware/software guitar processing system utilizing a Tipton mini-PC, Reaper-based DSP chain and MIDI Captain controller. Implemented MIDI automation, dynamic preset management and low-latency audio processing, creating a fully portable professional live-performance solution.
- AI & Automation Initiatives: Developed practical AI-driven solutions utilizing modern LLMs, prompt engineering techniques and workflow automation to improve operational efficiency and decision-making processes.
- Raven Trophy Music Project: Independently created, produced and released an original music project, combining composition, sound design, recording, mixing and visual branding.
- Podcast Soundtracks: Composed, produced and mixed original music for popular true-crime podcasts including "Opowiem Ci Historię", "Mafijne Opowieści" and "Niewyjaśnione".
- Leadership & Event Coordination: Led multidisciplinary teams and coordinated large-scale academic and media events, managing logistics, technical infrastructure and stakeholder communication.
